

Resopathy™

Conversing with the Body's Intelligence

Kimchi Moyer
October 19-21, 2017
Louisville, Kentucky

A black and white photograph of Nikola Tesla sitting in a chair, leaning forward with his hand to his face in a thoughtful pose. The background is a dark, grid-like pattern of concentric circles and intersecting lines, creating a complex geometric design. The lighting is dramatic, highlighting Tesla's features and the texture of his clothing.

“The day science
begins to study
non-physical
phenomena, it
will make more
progress in one
decade than in
all the previous
centuries of its
existence.”

— Nikola Tesla

14,000 Asian Refugees Seek Free

OAKLAND, Calif. (UPI) — A small boy peeks around the hatch of a Jumbojet, grasps the hand of his sick mother and boldly walks onto the tarmac of a new land.

Their five-year trek from Indochina ends here. But the mother can only feel her freedom. One of her eyes is glazed over. The other is punctured and empty. They are just one of thousands of broken families stepping into the unknown.

For them, and the 14,000 other Indochinese refugees still pouring into the United States each month, the real journey has not yet ended

and the joy of reaching their destination is muted by lost families, dead or left behind.

Three to four days a week planes come from Bangkok, Singapore and Malaysia to Oakland International Airport and unload refugees, 500 or so per plane, from camps along the Thailand-Cambodia border where they had waited for years.

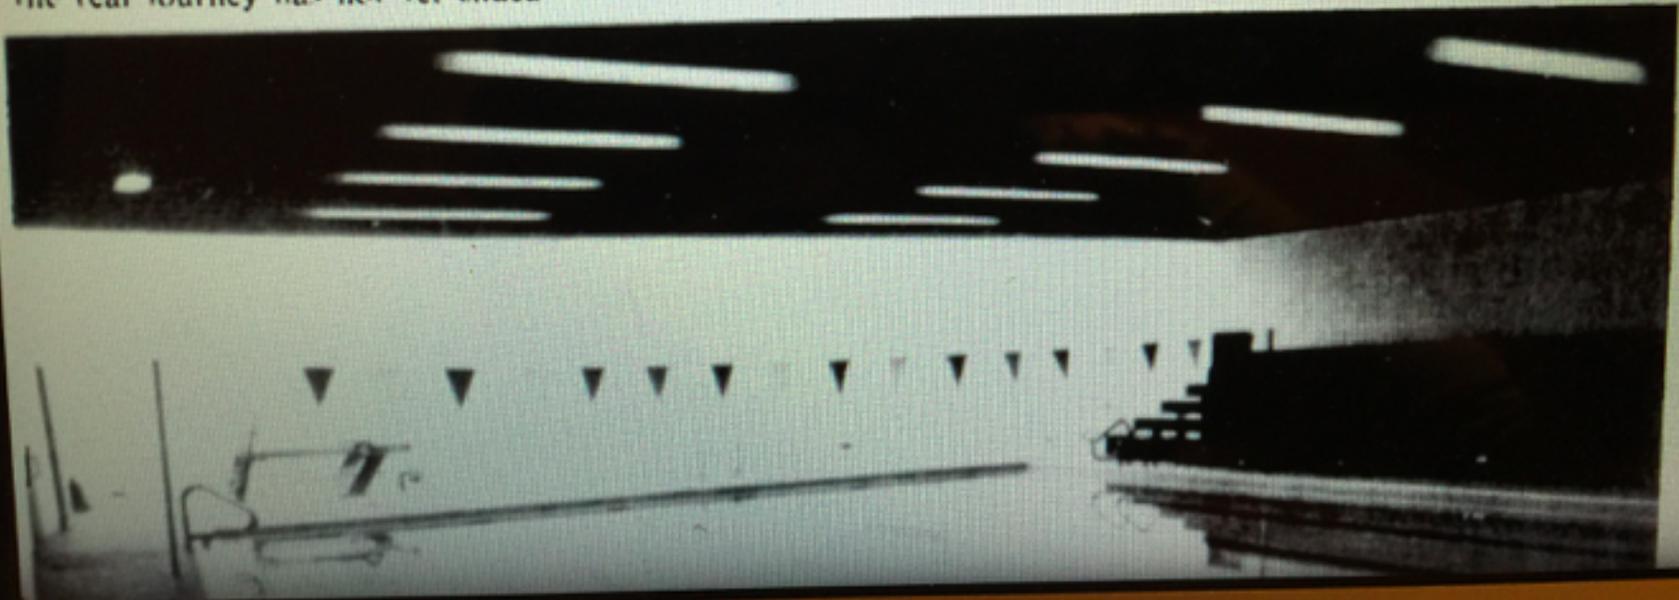

They fled in boats or swam across the Mekong River into refugee camps in Thailand to escape wars and political upheaval in homelands that will no longer sustain them.

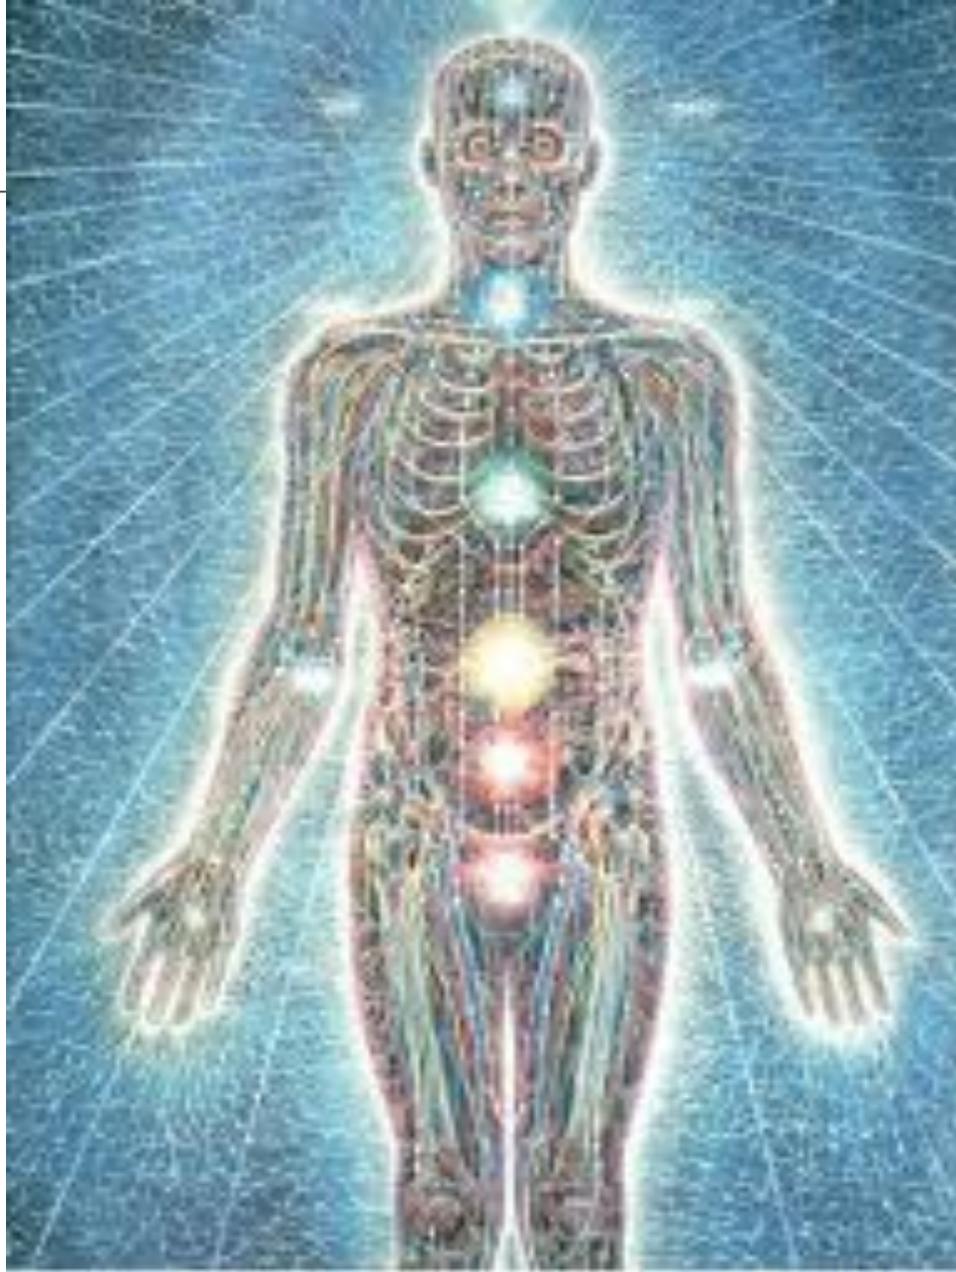

"I could not be a man there, I

could not provide for my family," said one Vietnamese refugee who would only say he had been a soldier in the South Vietnamese army.

"So when the chance came I left, I left my family, I left them all," he said.

But there are no shouts of joy, no tears, almost no recognition of the enormity of their feat. Years in refugee camps and 20 hours on a plane — for many their first flight — have sapped whatever joy their success might bring. As the line forms in the customs hall, heads sag and children sleep.

VEGA

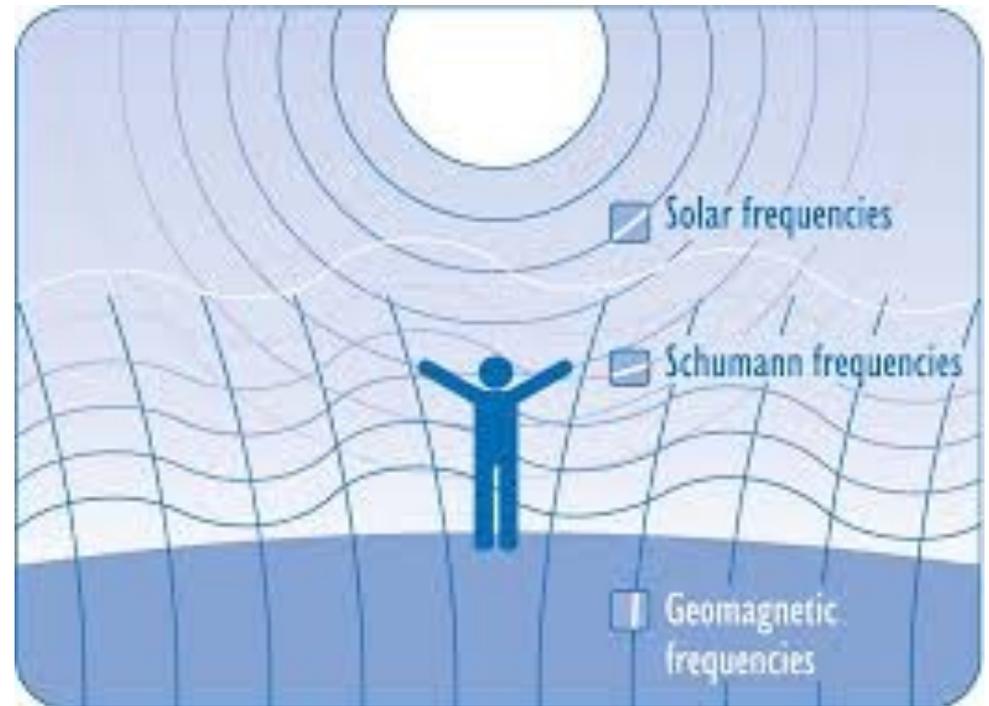

VEGA Grieshaber Kg

Measurement technology for highest reliability in every application

VEGA develops and manufactures sensors for the measurement of **level**, **point level** and **pressure** as well as equipment and software for integration into process control systems.

Dr. Wolfgang Ludwig

Dr. Fritz Albert Popp

Quantum Physics Discoveries

Every human cell has:

- Biophoton emissions that orchestrate all bodily processes.
- A semi-crystalline matrix.
- An ideal resonant frequency or vibration.

Read more in "The Field" by Lynn McTaggart.

Dr. Popp's Discovery:
The Human Cell Has an Energetic Structure

Fritz Albert Popp, PhD

Dr. Bodo Koehler

Classical Mechanics:
Universe=Energy & Matter

Quantum Mechanics:
Universe=Energy/Matter

Biophysical Mechanics:
**Living Systems=Energy/Matter &
Information**

Reality consists of Fields

All living systems are controlled by a **bio-electronic field of energy/information** to which all material processes are subordinate.
(Bio-Physical Mechanics)

©Kimchi Moyer, L.Ac. 2017

Bio-Informational Processes

- In the organism, **chemical processes are actually bio-informational processes.** Molecules are formed from atoms by means of **electron exchange**, i.e. energetic processes. And we are thus already into **quantum physics.**
- **No metabolic reaction in the body can take place without the transfer of the relevant information.** (Dr. med. Bodo Koehler)

©Kimchi Moyer, L.Ac. 2017

Reality consists of Fields

- "Below the level of elementary parts, **matter exists only as a wave or does not exist.**"

Prof. Dr. H. P. Duerr (German Atom Physicist, student of Heisenberg)

©Kimchi Moyer, L.Ac. 2017

Reality consists of Fields

"Below the level of elementary parts, matter exists only as a wave or does not exist."

Prof. Dr. H. P. Duerr (German Atom Physicist, student of Heisenberg)

"If you want to find the secrets of the universe, think in terms of energy, frequency and vibration."

Nikola Tesla

©Kimchi Moyer, L.Ac. 2017

Matter obeys Energy

- **Matter obeys superordinate energetic interaction forces and that the form and structure of matter depend directly on these forces.**(Dr. Carlo Rubbia, 1984 Nobel Prize Physicist, Head of CERN Geneva)
- **Blood follows Qi** (Traditional Chinese Medicine Principle)

©Kimchi Moyer, L.Ac. 2017

Reality Consists of Fields

- Matter consists of the triple:
 - Mass
 - Energy
 - Information (Fractal)

Ratio of mass to energy

- The ratio of mass particles (nucleons) to the energy particles (photons) is $1 : 9.746 \times 10^8$. (Dr. Carlo Rubbia)
- This means it takes ***one billion energy units to create one single unit of mass.***

©Kimchi Moyer, L.Ac. 2017

Reality Consists of Fields

- Our fields are electric and magnetic
- Electric field induces magnetic field and vice versa
- Strong electric field is called potential field
- It is the force of the fields that holds the structure

©Kimchi Moyer, L.Ac. 2017

Properties of the Vacuum

- Fractal Compounds (Fractal information is embedded in both macrocosmos and microcosmos)
- Self organized
- Highly coherent

©Kimchi Moyer, L.Ac. 2017

Diseases: Loss of Coherence

Disturbances arise from:

- Emotional Chaos (loss of order)
- Toxic substances from outside (interference)
- Outside information (radiation)
- Changed water structure (geopathic stress)

©Kimchi Moyer, L.Ac. 2017

Diseases=Loss of Regulation

Disease is a ***disorder*** of a dynamic process of ***regulation*** which involves the ***entire*** organism.

Permanently disrupted regulation is viewed as the ***root cause*** of many ***systemic illnesses***, and is often connected to ***environmental pollution***, whether ***external*** or ***internal***.

©Kimchi Moyer, L.Ac. 2017

Understanding Regulation

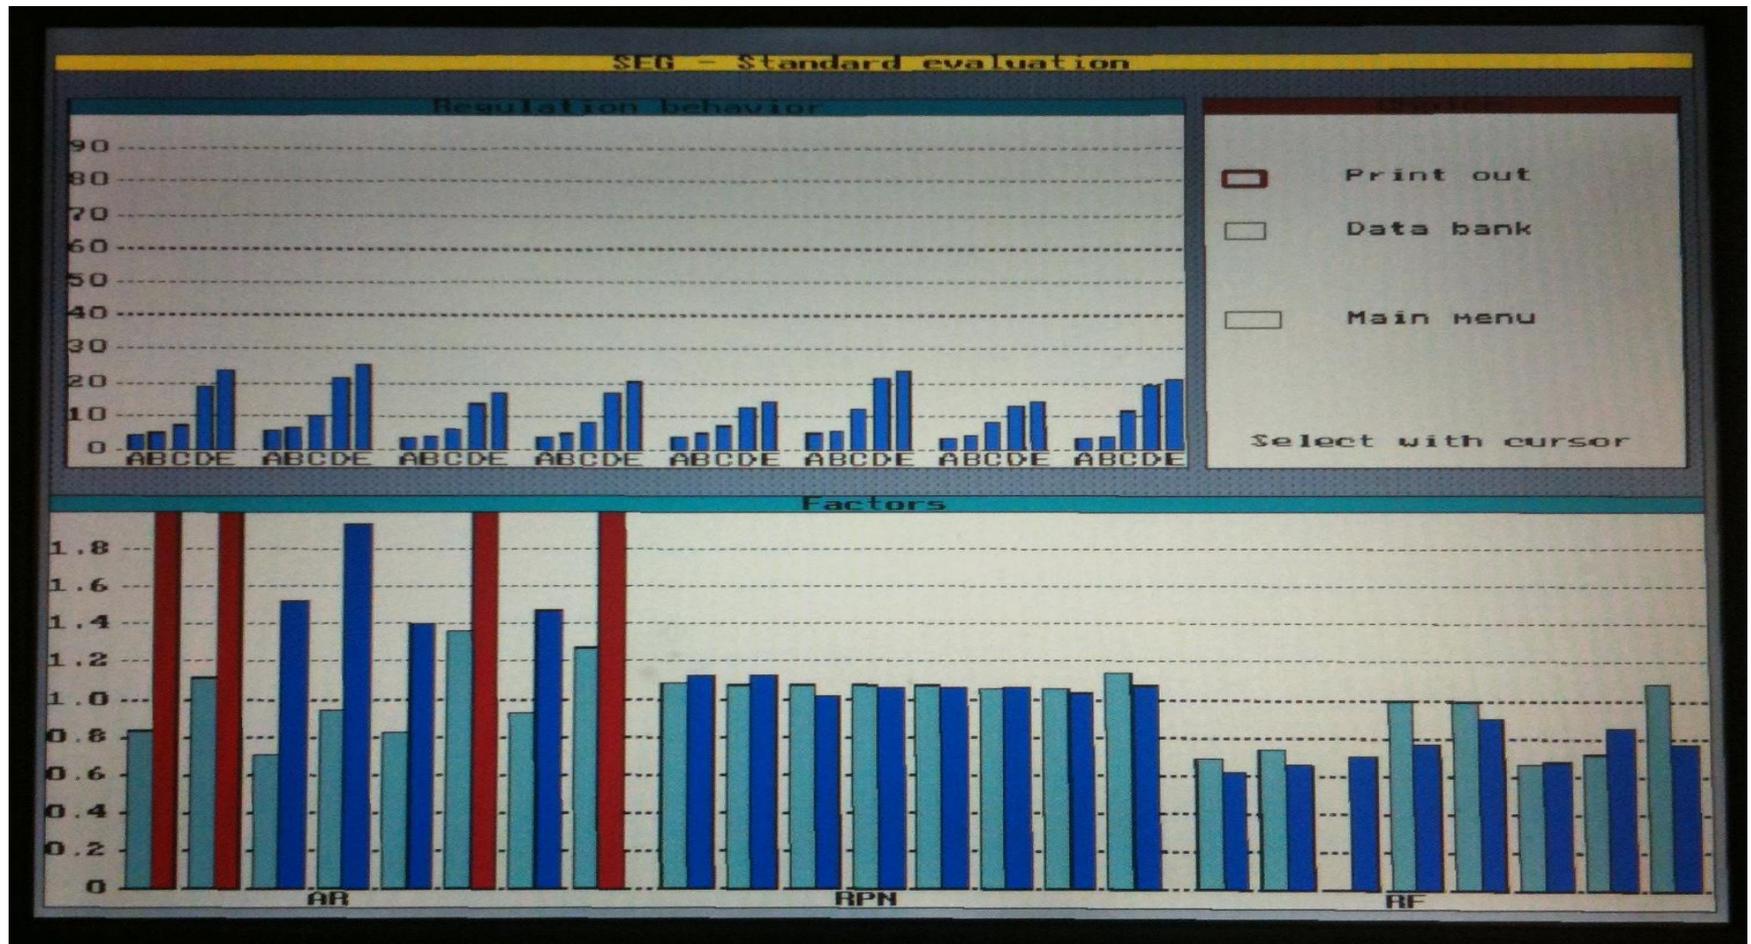

- Reaction is Regulation
- Regulation is Adaptation
- The ability to regulate is the key to health

©Kimchi Moyer, L.Ac. 2017

Examples of Regulation

- *Positive regulation*
- *Negative regulation*
- *Rigid regulation*
- *Hyper regulation*
- *Hypo regulation*

Positive Regulation – SEG

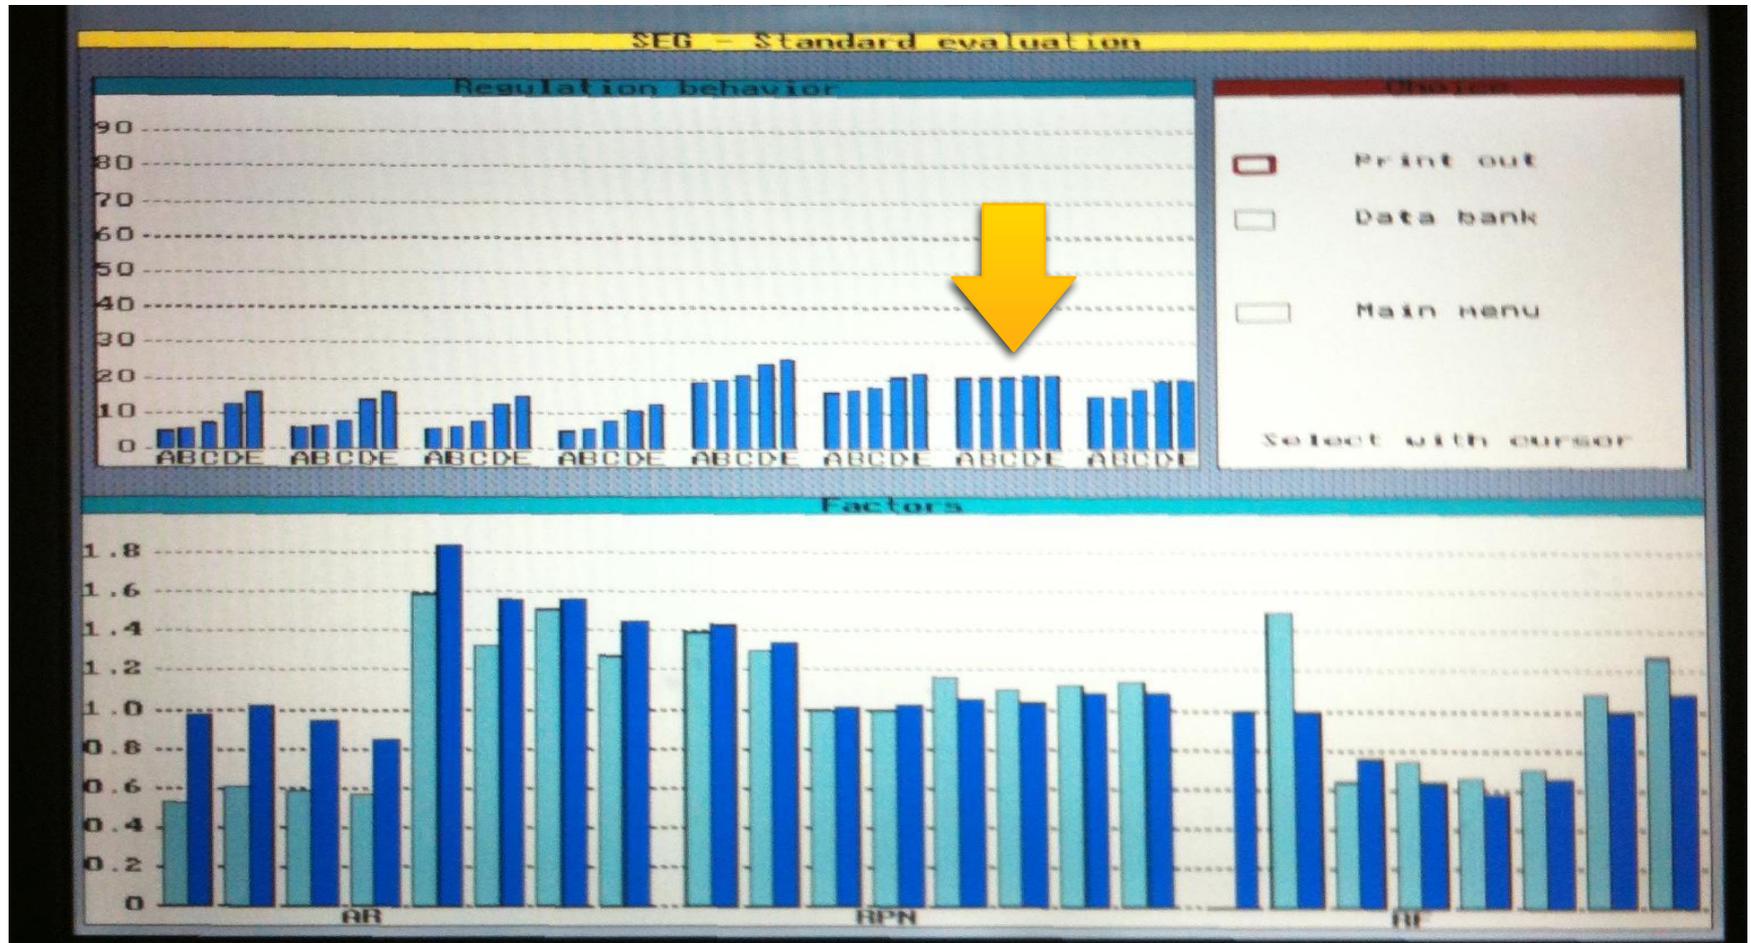

©Kimchi Moyer, L.Ac. 2017

Negative Regulation-SEG

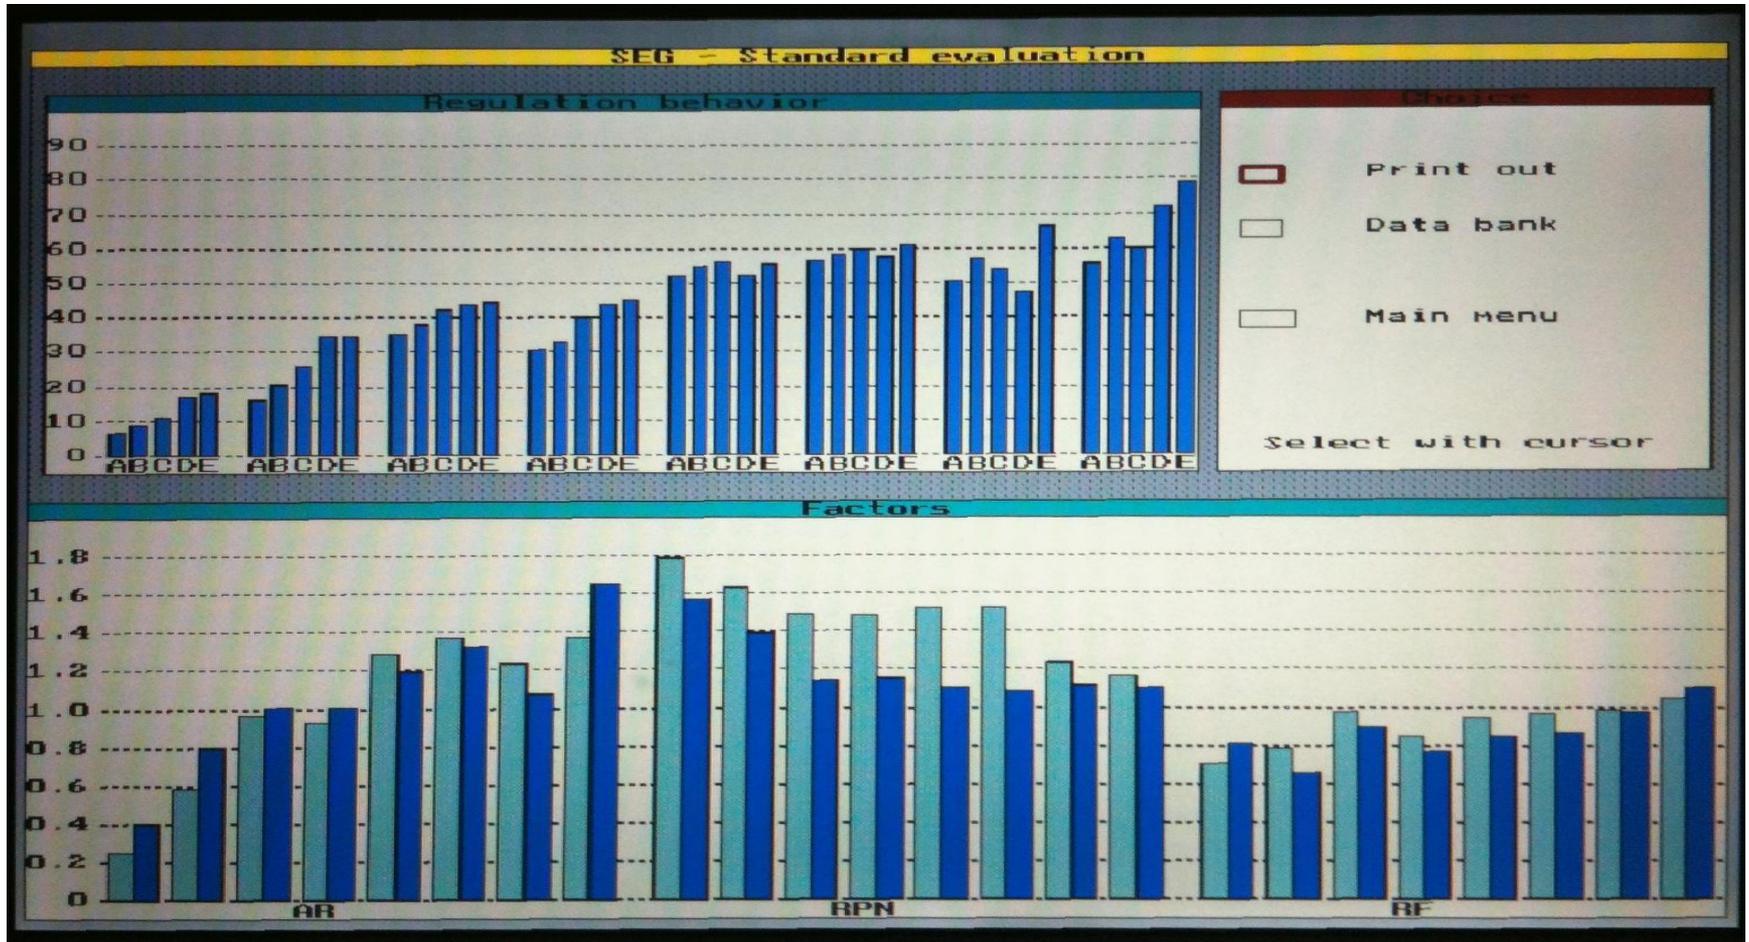

©Kimchi Moyer, L.Ac. 2017

Rigid Regulation-SEG

©Kimchi Moyer, L.Ac. 2017

Hyper Regulation-SEG

Hypo Regulation-SEG

©Kimchi Moyer, L.Ac. 2017

What if...

- ...We can converse with the intelligence of the organism?
- ...Your body could have a voice to express what it wants and needs in order for it to function at its optimum level?
- ...You had a way to collaborate with the body and let it tell you what it wants and needs and how best to repair itself?

©Kimchi Moyer, L.Ac. 2017

Resopathy™ defined

- Resopathy™ is a health modality using resonance and advanced biofeedback technologies to gather biological data by measuring the body's natural electrical field.

©Kimchi Moyer, L.Ac. 2017

Resopathy™:

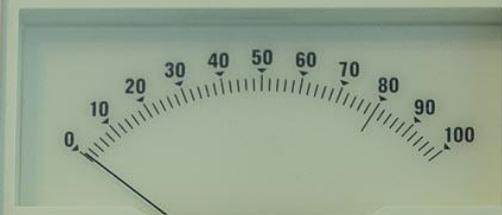

Based on point conductivity measurement

A binary (YES/NO) system using both resonance and galvanic skin response (GSR) as a feedback mechanism to solicit information from living organisms.

©Kimchi Moyer, L.Ac. 2017

Resonance

A resonance occurs when two or more substances have similar or the same frequency.

©Kimchi Moyer, L.Ac. 2017

Resopathic Observation

- Over 2000 cases
- From infants to 93 years old.

©Kimchi Moyer, L.Ac. 2017

Resopathic Observation

- What we eat & drink everyday determines what organisms we grow.
- Products with high fermentation such as wine, beer, alcohol, vinegar, sugar, grains, and especially heavy metals such as mercury toxicity fuel yeasts to rise rapidly.

©Kimchi Moyer, L.Ac. 2017

Resopathic Observation

- Bacterial overgrowth feeds on yeast fermentation.
- Long term overgrowth of yeast and bacteria often results in viral infection.
- Long term viral infections are commonly seen in molds, parasites, premalignant and malignant cases.

©Kimchi Moyer, L.Ac. 2017

Resopathic Observation

- Lifestyle diseases (such as diabetes, high blood pressure, cancer etc.) are seen in meat eaters, carb eaters, raw food eaters, vegetarians, vegans, athletes, CEOs, gurus, health practitioners... including supplement experts.
- It is also seen in people that do not smoke, do not drink alcohol, eat organic food, and exercise regularly.

©Kimchi Moyer, L.Ac. 2017

Resopathy™: Solving the Puzzle

- Where is it? (What organs?)
- What's going on? (What toxins?)
- How bad is the situation ? (What are the numbers?)
- What are the key remedies?

©Kimchi Moyer, L.Ac. 2017

Resopathy™: Basic Case Work up Protocol

Navigating through the myriad of supplements

Efficacy and dosage

©MarcoMissinato

Resopathy™

- The modality serves as a sort of GPS for the body; an internal guidance to help us navigate our biological terrain.
- By having a feedback mechanism, and allowing the body to have a “voice”, we can be more effective in achieving targeted results.
- The next generation in personalized healthcare

©Kimchi Moyer, L.Ac. 2017

Resopathy™

By conversing with the body's intelligence, a resopath can be a great ally to:

- Naturopaths
- Allopaths
- Homeopaths
- Dentists, etc...

To help health practitioners in navigating the biological terrain of their clients and be more effective in their recommendations.

©Kimchi Moyer, L.Ac. 2017

- Vision
 - Gathering biological data through resonance and biofeedback technologies.
 - Compile case studies
 - Training the next generation of resopaths
 - Creating certification courses
 - Continue research and development
