

Welcome to HQ Global LLC

HeartQuest Global LLC

Clues...Not Diagnoses

HeartQuest Pro does *not* generate medical diagnoses. It informs the patient and doctor how well the adaptive ANS can respond to

all that life can throw at a person and still maintain resistance against physical, mental, emotional, and spiritual stress parameters utilized in Heart Rate Variability.

All parameters on HeartQuest come from the premise that all systems of the body are interconnected and not separated and can be deciphered to ascertain information

the western and eastern health

HeartQuest Pro information should be interpreted by a licensed health professional and decisions made from the HeartQuest Pro information is directly the responsibility of the individual practitioner and not HeartQuest Global or Global Health Solutions

Pro

Comparison of
data

HQ Allows the health provider to track valuable health information about their patient 24/7

Remote

Can't sleep at 12:00

Testing

Is my patient reacting to wheat, diary, etc. Test

Test utilizing the Chinese clock at the exact time

Test the exact time when the patients' symptoms occur

Profile: Test

Age: 30

To compare recording select a recording in the dropdown list on both columns

The Challenge of Energy Medicine

**Light, Sound, Homeopathy,
Acupuncture**

**Testing utilizing Asyra, NES, Qest4, EAV, ART, NET,
Kinesiology**

**On the bright side,
Energy Medicine
can reveal the causal
factors.**

**It's fascinating
and provocative
and often very
clinically effective.**

But it can also be incredibly frustrating.

Changing patients' belief systems.

Not really knowing that your therapies are truly effective and improving your patients' health on multiple levels because you can't visually see tangible/objective changes.

When things get extremely complex, they either look random...or like magic.

Holograms are so densely packed with information that up close they look like random noise...

**But when you look at them
in the right light, they
become pure 3D magic!**

HQ can validate your treatment because of its objectivity and accuracy and it's highly visual

HRVHQ

YOUR HQ FOR HEART RATE VARIABILITY

and beyond

Pacemaker of the heart

SA node

HRV is the measure of variance in time intervals between successive heartbeats

Control

Fast Fourier Transform

The HRV signal can be analyzed by spectral analysis to demonstrate patterns of autonomic nervous system health or dysfunction using a technique called **Fast Fourier Transform**. This method allows us to break down frequency band widths that correspond to specific physiologic functions

Frequency Spectrum

Amazing interconnectivity of the human body.

Sympathetic nervous system, GB/LV, HT/SI, Pitta, Epinephrine, Cortisol

Parasympathetic nervous system, ST/SP, PC/TW, Kapha, Insulin

Neurohormonal regulation, LU/LI, KI, BL, VATA, DHEA, Estradiol

H

L

VL

TP 1500-3000
Stress Index 10-100

Adrenal
cortisol low with
predominate HF band.
TP start to decrease to
1000 or below, stress
index may increase.

H

LF/HF balance
Normal stress index
TP normal range

L

LF/HF ratio high
Increased stress index

VL

Chronic
LF/HF ratio high or normal
With tendency for high VLF
Decreased TP and less than
1000 and increased stress
index will be over 500

L

LF/HF low, High

H

predominance of HF, High
stress index, and very low
total power, decreased
BP,HR and respiration

Integrating With Other Tests

EAV

**Nutritional, Homeopathy,
Herbal**

HEARTQUEST

**Functional medicine
or German Biological
Medicine**

**Muscle Testing/
Kinesiology/ART**

**Other
Modalities**

Earliest triggers of chronic disease is dysfunction of the ANS

It is impossible to be healthy with a dysregulated ANS

Improving ANS function helps alleviate a wide array of problems

Abnormal
Sweating
Anhidrosis
Anxiety
Arrhythmias
Atherosclerosis
Autism
Autoimmune
Disorders
Bipolar
Disorders
Bladder
Dysfunction
Broken Heart
Syndrome

► Identifying the Primary Drivers of CHRONIC ILLNESS

I stress about stress before
there's even stress to stress about.
Then I stress about stressing
over stress that doesn't need
to be stressed about.

It's stressful.
